New Market is proving himself across the country. Reports from producers say that his progeny are easy calving and fleshing, with excellent ratios on weaning when compared to other leading bulls of the breed. We have had excellent interest in New Market over the past year and we'll see a lot of calves starting this fall.

This 1407 son has a good hip and plenty of muscle. The bottom side of his pedigree is stacked for muscle and maternal performance. His grandam is the dam of Exaltation and stems from the great Rita 5H11. Needless to say, New Market holds a lot of promise for carcass potential. He is a bull that will add value to your cow herd and add dollars to your bank account!
